

All About Summer

Summer is one of the four seasons. It comes after spring. Summer begins in June and ends in September. In summer, we celebrate the Fourth of July. This is America's Independence Day. You will see American flags and fireworks at a celebration.

In summer you might see butterflies flying around in your yard. There may be birds singing in the trees. Crickets might chirp in the grass. Some mammals lose their warm winter coats to stay cool in the summer sun.

Many delicious foods are in season during summer. Summer fruits are strawberries, peaches, and cherries. They make a healthy, sweet dessert. Summer vegetables are corn, carrots, and cucumbers. They make great food for barbecues.
